As a .NET Full Stack Developer with a unique background in the U.S. Navy, I offer not only technical expertise in ASP.NET, MVC, Blazor, React, Azure SQL, and EF Core as demonstrated in three major projects but also unparalleled discipline, leadership, and problem-solving skills from my Navy service, making me a versatile and dynamic asset to software development teams.

## PROJECTS

### AI-Enhanced Blog Platform - HVAC TopGun

Oct 2023

- A modern Blazor-based blog platform with Azure SQL, EF Core, and Dapper. Features Azure AD B2C authentication, AI customer service bot via Microsoft Bot Framework, and a Synchfusion-powered dashboard. Tailwind CSS ensures a responsive design.
- [Live Demo](#)

### Contact Management Application - Blackbook Pro

Oct 2022

- Created a fully functional contact management site using Microsoft Identity Framework, MVC, ASP.NET Core MVC, and PostgreSQL. Enables users to store contacts, filter by a category, search, and email contacts
- [Live Demo](#)

### Blog PlatForm - CodeTalk

Nov 2022

- Created a blog platform using ASP.NET Core MVC, Microsoft Identity Framework, EF Core, and PostgreSQL. Implemented a role-based security system, file upload, search, and email service.
- [Live Demo](#)

## WORK HISTORY

### .NET Freelance Full-Stack Developer

#### Bluejackett

Apr 2019 - present

Expertise in end-to-end software development using .NET for backend and React for frontend. Delivered comprehensive solutions, managing projects from concept through to completion, and ensured high client satisfaction by meeting specific functional requirements.

### Java Program Student

#### SkillStorm VETTEC

Feb 2023 - Apr 2023

The program provides intensive training in Java and front-end technologies with React and JavaScript, and web development.

### Teacher (NJROTC) Instructor

#### San Diego Unified School District

Apr 2019 - May 2021

CyberPatriot Team Coach: Guided a team focused on mastering cybersecurity skills, including defense against intrusions and maintaining network security. Successfully led the team to qualify for the National Finals in 2020.

### Chief Petty Officer

#### United States Navy

June 1998 - Oct 2019

- Twenty-Year Navy Veteran: Rich background in diverse skills and disciplined approaches.
- Problem-Solving & Leadership: Proven abilities in high-stakes environments.
- Technology Experience: Extensive exposure to technology applications and systems.
- Unique Perspective: Ready to bring a distinct approach to software development challenges.

## SKILLS

### Languages:

C# | JavaScript | SQL | HTML5 | CSS3 | Razor | JSX | TypeScript

### Frameworks:

ASP.NET | Bootstrap | Entity Framework | Azure | AWS | Tailwind | Next.js

### Databases:

MSSQL Server, Azure SQL

## EDUCATION

### Software Engineering, BS

Western Governors University

Expected Graduation: June 2024

### Business Management, BS

Marylhurst University

## CERTIFICATIONS

- **AWS Certified Cloud Practitioner**
  - [View Certificate](#)
- **WGU Front-End Developer Certificate**
  - [View Certificate](#)
- **Security Clearance (DOD)**

## PROFESSIONAL DEVELOPMENT

- **C# Algorithms**
  - [View Certificate](#)
- **API Design Patterns**
  - [View Certificate](#)
- **.NET Framework Skill Assessment**
  - [View Test Score Results](#)
